

Algebraic groups seminar

September 14 (Monday) 13:00, zoom ID 675-315-555

Sergey Sinchuk (St. Petersburg State University)

«A pro-group approach to the centrality of K_2 (joint work with A. Lavrenov and E. Voronetsky)»

The aim of the talk is to present an overview of the recent preprint arxiv.org/abs/2009.03999, where the centrality of K_2 is proved for all Chevalley groups of rank ≥ 3 . We will discuss the history of the problem and the motivation behind it. Also we will focus on the novel pro-group technique introduced by Voronetsky.

Everyone is welcome!
